Thirty Cemig Core Sectors receive certificates for their Management Systems

On November 13th, in the auditorium of the head office, Cemig held a solemn ceremony to deliver the certificates for their Quality, Environmental, Health and Safety Management Systems. In all, 30 core sectors received trophies, certificates and plaques, in recognition of their achieving conformity with the requirements established in the NBR ISO 9001 and 14001 and OHSAS 18001 series of norms. With these certificates, 96 areas of the Company are now certified.

At the event, the Corporate Sustainability Superintendence – SE also honored the internal verifiers that stood out in the past year and released the results of the Management Systems Awareness Survey. The employees celebrated the certifications with balloons, streamers and a shower of confetti at the end of the ceremony.

The event was preceded by a brief speech by Cemig CEO President Djalma Bastos de Morais (see photo) who emphasized the Company's various achievements over the course of the year, such as the eighth consecutive selection of Cemig as part of the Dow Jones Sustainability Index, inclusion in the *150 Best Companies to Work For* list produced by Guia Você S/A magazine and its selection as the best electric energy utility in the South-eastern region by the IASC Award.

“By raising our level, we are also raising the level of Cemig”, concluded Djalma Morais.

In addition to the CEO of the Company, also present at the ceremony were Chief Corporate Management – DGE Officer Marco Antonio Rodrigues de Cunha, Chief Commercialization and Distribution – DDC Officer José Maria de Macedo, Chief New Business Development – DDN Officer José Carlos de Mattos, Chief Transmission and Generation – DGT Officer Fernando Henrique Schuffner Neto, Corporate Sustainability – SE superintendent Luiz Augusto Barcelos Almeida and Bureau Veritas Certification commercial director Walter Laudísio.
