

Climate Positions and Lobbying Activities Report

2025

1. Introduction

Climate change is currently one of the most important issues of and requires immediate and coordinated action involving the cooperation of several players in search of sustainable solutions aimed at implementing public policies and business incentives promoting the mitigation of greenhouse gas (GHG) emissions.

We understand that companies, governments, associations, NGOs, must support the climate goals of the Paris Agreement and commit to science-based actions to keep global temperature increases well below 2°C or 1.5°C above pre-industrial levels, as well as ensuring a neutral balance between emissions and removal by sinks of Greenhouse Gases (GHG), in the period 2050-2100.

We support the energy transition and influence public policies promoting renewable energy through our participation in associations and business groups. We invest in grid, technological development for energy transition and energy storage, helping Brazil achieve a 100% renewable electrical matrix. Nowadays, Brazilian electrical matrix is 92% renewable

Cemig is part of industry associations and all are aligned with the ambition of limiting global warming to 1.5°C. We do not carry out political standing activities individually, only through associations. As we are located exclusively in Brazil, our focus is within national scope.

These organizations provide a forum to allow members to focus on advocating for issues and promoting sharing best practices. Through our membership in associations, we can collaborate and combine efforts with others in the industry on a range of issues we face, including climate change and review and monitoring the engagements. These associations statement the position through 'position papers' that are previously analyzed by the Sustainability department. This ensures that the positions are aligned with Cemig's stance. Similarly, 100% of Cemig's statements are previously aligned and validated by the Sustainability department, ensuring that they are aligned with the ambition of limiting global warming to 1.5°C."

In 2024, Cemig join to The Utilities for Net Zero Alliance (UNEZA) that was established at COP28 with the adoption of the [UAE Declaration of Action](#). This Alliance unites leading global utilities and power companies with the aim of spearheading the development of grids that are ready for renewable energy, promoting clean energy solutions, and advancing electrification efforts. UNEZA operates under the guidance of the International Renewable Energy Agency (IRENA) and the UN Climate Change High-Level Champions, ensuring a focused and strategic approach to achieving a sustainable energy future.

2. Political Standing

Our standing is to support initiatives promoting laws and regulations related to matters as:

- a) **Greenhouse gas emissions:** We support laws imposing emissions limits on industries, incentives for renewable energy sources, and policies reducing the use of fossil fuels.
- b) **Adaptation to climate change:** we work to promote initiatives aiming to finance protection measures against extreme climate events, such as droughts and floods.
- c) **Carbon prices:** we support groups that can lobby for the implementation of carbon pricing mechanisms, for example, the implementation of the regulated carbon market in Brazil.
- d)

The associations and alignment levels are presented below.

Table 1: Presentation of Political Engagement data aligned with the Paris Agreement

Association Name	Association Category	Description	Level of alignment with Paris Agreement	There is a gap between the performance of the association and the Paris agreement in 2024	How Cemig operates, review and monitor in the Association
Global Compact – Net Zero Ambition Movement	Civil Society – Non-governmental organization (NGO)	The initiative aims to adopt rigorous and immediate measures to reduce global emissions by 2030 and achieve net-zero greenhouse gas emissions by 2040.	Level of alignment with the Paris Agreement and considered “high”	no	<p>Cemig participates in meetings and seeks to influence other players in the pursuit of net zero commitment. By joining the Net Zero Ambition Movement, Cemig made a commitment to annually publish an inventory of greenhouse gas (GHG) emissions; and reduce GHG emissions in line with the criteria of the Science Based Targets initiative (SBTi). Global Compact statement the position through 'position papers' that are previously analyzed by the Sustainability department. This ensures that the positions are aligned with Cemig's stance.</p> <p>In 2024, positions were aimed at limiting global warming to 1.5°C.</p>
Brazilian Business Council for Sustainable Development (CEBDS)	Civil Society – Non-governmental organization (NGO)	<p>Organized in 1997, the goal of CEBDS is to disseminate the debate on Sustainable Development in Brazil, and works to consolidate itself as a reference initiative in the country, and in the world, in fighting the main crises affecting the climate, nature and society.</p> <p>Through advocacy, CEBDS works as a</p>	Level of alignment with the Paris Agreement and considered “high”	no	<p>Cemig participates in meetings, contributing to influencing public policies and strategic guidelines that promote a development model, focused on a cleaner and more inclusive economy.</p> <p>The organization supports the regulated carbon market in Brazil and the promotion of sustainable development. CLIMATE POSITIONS AND LOBBYING ACTIVITIES REPORT

Association Name	Association Category	Description	Level of alignment with Paris Agreement	There is a gap between the performance of the association and the Paris agreement in 2024	How Cemig operates, review and monitor in the Association
		network to influence public policies and develops initiatives in partnership with companies, organizations and governments, seeking to promote sustainable actions and practices.			position through 'position papers' that are previously analyzed by the Sustainability department. This ensures that the positions are aligned with Cemig's stance. In 2024, all positions were aimed at limiting global warming to 1.5°C.
Utilities for Net Zero Alliance (Uneza)	Civil Society - NGO	UNEZA (Utilities for Net Zero Alliance) is an international platform that aims to accelerate the adoption of renewable energy and overcome common obstacles to achieving global net-zero ambitions. UNEZA was launched at COP28 and is coordinated by IRENA (International Renewable Energy Agency). UNEZA's Members and Partners recognize that the key to unlocking the utility sector's global energy transition potential lies in the ability to deliberately target existing structural, regulatory, and financial impediments and challenges that may stand in the way of progress.	Level of alignment with the Paris Agreement and considered "high"	no	<p>In 2024, Cemig joined UNEZA, the initiative brings together the main concessionaires and public service companies in the electricity sector with the aim of promoting clean energy solutions and advancing the process of global energy transition and decarbonization of the economy..</p> <p>A Cemig é member of the Steering Group da Uneza. Uneza statement the position through 'position papers' that are previously analyzed by the Sustainability department. This ensures that the positions are aligned with Cemig's stance. In 2024, all positions were aimed at limiting global warming to 1.5°C.</p> <p>A Cemig é a primeira empresa do setor elétrico com origem brasileira a fazer parte dessa aliança.</p>
Public Emissions Registry – Brazilian GHG Protocol Program	Civil Society - NGO	Public Emissions Registry is a pioneering platform in the country for the transparent, quick and simple disclosure of corporate greenhouse gas (GHG) emissions inventories of organizations participating in the Brazilian GHG Protocol Program.	Level of alignment with the Paris Agreement and considered "high"	no	<p>Cemig has been publishing its greenhouse gas emissions inventory on the RPE Platform since 2024. Our goal is to make our information more transparent and contribute to the advancement of emissions disclosure and the strengthening of the initiative in the country.</p> <p>There were no lobbying activities by this Organization in 2024..</p>

CLIMATE POSITIONS AND LOBBYING ACTIVITIES REPORT

Association Name	Association Category	Description	Level of alignment with Paris Agreement	There is a gap between the performance of the association and the Paris agreement in 2024	How Cemig operates, review and monitor in the Association
Science Based Targets (SBTi)	Civil Society - NGO	<p>The Science Based Targets initiative (SBTi) is a corporate climate action organization that enables companies and financial institutions worldwide to play their part in combating the climate crisis.</p> <p>We develop standards, tools and guidance which allow companies to set greenhouse gas (GHG) emissions reductions targets in line with what is needed to keep global heating below catastrophic levels and reach net-zero by 2050 at latest.</p>	Level of alignment with the Paris Agreement and considered "high"	no	<p>In 2022, Cemig committed to defining science-based emissions reduction targets (short- and long-term targets) in accordance with the SBTi criteria and recommendations, submitting them to the SBTi for validation, and publishing the targets once approved within 24 months.</p> <p>In January 2025, the short- and long-term (net zero) targets were approved by the SBTi.</p>
Municipal Committee on Climate Change and Eco-efficiency - CMMCE of Belo Horizonte	Local Government - City Hall of Belo Horizonte	<p>CMMCE is a collegiate and advisory agency, which aims to support the implementation of the municipal policy of the City of Belo Horizonte for climate change, acting in the articulation of public policies and private initiatives aimed at reducing emissions of greenhouse gases and air pollutants, reducing the production of solid waste and greater efficiency in the processes of reuse and recycling of waste; encouraging the use of renewable energy sources, improving energy efficiency and rational use of energy and increasing environmental awareness of citizens.</p>	Level of alignment with the Paris Agreement and considered "high"	no	<p>Cemig participates in meetings, contributing to the search for initiatives to reduce GHG emissions and formulating legislation on the subject.</p> <p>In 2024, all operations and positions were aimed at limiting global warming to 1.5°C.</p>

CLIMATE POSITIONS AND LOBBYING ACTIVITIES REPORT

Association Name	Association Category	Description	Level of alignment with Paris Agreement	There is a gap between the performance of the association and the Paris agreement in 2024	How Cemig operates, review and monitor in the Association
ENVIRONMENTAL Thematic Group – Preparing the Climate Crisis Technical Seminar in Minas Gerais (MG)	Local government – State Legislature of Minas Gerais (ALMG)	ALMG is discussing public policies necessary to combat extreme weather phenomena in the state of Minas Gerais. In March 2024, it was launched the Climate Crisis Technical Seminar in Minas Gerais – Challenges	Level of alignment with the Paris Agreement and considered “high”	Yes	Cemig participates in meetings, supporting the search for technological solutions and public policies promoting continuous actions, of a medium and long-term structuring nature, mitigating the impacts of climate change in the most affected regions of the state of MG. In 2024, all operations and positions were aimed at limiting global warming to 1.5°C.
Alliance for Climate Action (ACA-Brazil)	Civil Society - NGO	Coalition of players from different industries of society, such as business leaders, investors and state and municipal governments, to strengthen the subnational climate agenda.	Level of alignment with the Paris Agreement and considered “high”	no	Cemig participates in meetings, aiming to influence the proposal of initiatives that promote the energy transition and combat climate change. In 2024, all operations and positions were aimed at limiting global warming to 1.5°C.
Council for Environment and Development - CEMA of the Federation of Industries of Minas Gerais - Fiemg	Civil Society - NGO	The purpose of the council is to propose changes to the environmental policy of Minas Gerais and Brazil with the aim of improving the business environment for the productive industry of Minas Gerais.	Level of alignment with the Paris Agreement and considered “high”	no	Cemig participates in meetings of the GT CEMA Climate Change and Air Quality, aiming to influence the proposal of environmental policies that promote the energy transition and combat climate change. In 2023, it is highlighted the evaluation of the bill introducing the carbon market in Brazil, where Fiemg was favorable, which demonstrates the position in the search to limit global warming to 1.5°C.
ABRAGE – Brazilian Association of Electricity Generating Companies	Business Association	ABRAGE aims to exchange technical, commercial, financial and legal information regarding electricity generation activities. In this association, there are renewable and non-renewable generators.	Level of alignment with the Paris Agreement and considered “average”	no	Abrage in 2024 did not oppose the Bill that establishes the carbon market. Cemig is positioned to support the energy transition in the country by helping to achieve a more renewable matrix.

Association Name	Association Category	Description	Level of alignment with Paris Agreement	There is a gap between the performance of the association and the Paris agreement in 2024	How Cemig operates, review and monitor in the Association
APINE – Brazilian Association of Independent Electricity Producers	Business Association	APINE has purposes making the association a strategy for Cemig. The purpose of promoting the defense of the interests of the electricity generation segment stands out, especially with regard to independent producers and similar generators, promoting the expansion of their market space and their profitability preserved. In this association, there are renewable and non-renewable generators.	Level of alignment with the Paris Agreement and considered “average”	no	<p>Abrage in 2024 did not oppose the Bill that establishes the carbon market.</p> <p>Cemig supports the energy transition and invests in infrastructure lines and networks to connect new renewable energy sources.</p>
Brazilian Clean Energy Generation Association – ABRAGEL	Business Association	ABRAGEL currently represents the most relevant generation agents for Hydroelectric Hydropower Generating Plants – HGP, Small Hydroelectric Power Plants – SHPs and Hydroelectric Power Plants – HPPs up to 50 MW in the country. Its main purpose is to promote the union of small and medium-sized electricity producers, companies, entities and associations interested in this market, representing their associates before public authorities, national and international bodies and institutions, defending their rights, interests and aspirations.	Level of alignment with the Paris Agreement and considered “high”	no	<p>All materials and publications made by ABRAGEL in 2024 were aligned with the Paris Agreement.</p> <p>Cemig supports the energy transition and invests in infrastructure lines and networks to connect new renewable energy sources.</p>

3. Engagement Guidelines

We are committed to establishing a target aligned with a 1.5°C decarbonization trajectory. In 2022, we joined the UN Global Compact's Net Zero Ambition Program and we undertook the commitment to reducing 90% of greenhouse gas emissions by 2040.

In 2024, we joined the Utilities for Net Zero Alliance (UNEZA), which aims to accelerate the adoption of renewable energy and overcome common obstacles to achieving global net-zero ambitions. UNEZA has a significant impact on accelerating the global energy transition by providing a platform for collaboration and investment to achieve net-zero targets. By fostering cooperation between energy companies and advocating for public policies, UNEZA contributes to a more sustainable and resilient energy future.

In 2025, we secured approval for the Science Based Target Initiative's short- and long-term science-based targets (net-zero).

For this reason, our Strategic Planning foresees investments to expand generation in renewable energy, modernization and reform of the electricity distribution infrastructure, investments in R&D Projects including energy storage and hydrogen and Energy Efficiency actions.

Our engagement management system in associations includes the following premises:

- a) our executives and leaders do not directly or indirectly support policies or initiatives that increase the risks and impacts of climate change.
- b) We participate in industry associations defending climate change policies.
- c) We monitor participation in direct and indirect associations, evaluating the alignment of these associations with the commitment to limit global warming to 1.5°C. Usually trade statement the position through 'position papers' that are previously analyzed by the Sustainability department. This ensures that the positions are aligned with Cemig's stance.
- d) We establish political positions aligned with strategic planning, as well as climate commitments.
- e) Representatives of the Company seek to influence or support research projects, specialized studies on the topic, political and business forums favorable to businesses aligned with the Paris Agreement.
- f) Participation in commercial associations, forums, committees, working groups, NGOs, are conditioned on the political alignment of initiatives that contribute to the reduction of GHG emissions and policies that encourage climate transition that limit global warming to 1.5°C. If there is lack of awareness in actions of any trade association in which the company participates, the representatives of the Company express their opinion by reaffirming their commitment to supporting regulatory changes that promote a sustainable future and informing their leaders about the issue.
- g) The representatives of the Companies in these associations, together with the executive board, analyze the climate policy positions and influences of commercial associations and when political inconsistencies occur, the option of distancing or discontinuing participation in these associations is analyzed, something that has not yet occurred.
- h) We support coalitions acting aligned with climate policies.
- i)

At Cemig, the Sustainability and Innovation Department is responsible for monitoring public policies linked to the ESG agenda and climate change, including the Paris Agreement.

The Board considers ESG issues to be an integral part of its business strategy oversight. The Executive Board, based on recommendations from the Communication and

Sustainability Board, assumes public commitments and validates goals related to tackling climate change.

The Sustainability Management supports the areas of the Company in carrying out actions that impact greenhouse gas emissions; tracks and monitors the performance of the Company in relation to the topic, in accordance with legislation, sustainability requirements and corporate goals.

To ensure the transparency of our actions:

- a) we publicly inform our participation in trade associations, NGOs, forums, committees, and their position in support of climate policies or initiatives that promote renewable energy growth measures or the introduction of a carbon price that is aligned with the achievement of net zero until 2050.
- b) we make this information available annually in the Annual Sustainability Report and in the CDP Climate Change questionnaire, reporting the connection with the Company's strategic planning and business.
- c) We annually disclose information on how climate risks impact business, we report investment data to limit global warming to 1.5°C, as well as our decarbonization strategy, in the questionnaire CDP for Climate Change, Report TCFD and Sustainability Report.

Finally, as previously mentioned, we closely monitor the position of the associations we participate in in relation to the Paris agreement. So far, they all support and seek to work to limit global warming. If there is lack of awareness in actions of any association in which the company participates, the representatives of the Company will express their opinion by reaffirming their commitment to supporting regulatory changes that promote a sustainable future and informing their leaders about the issue.

4. Climate lobbying expenses

Table 2: Presentation of climate lobbying expenses

Organization Name	Lobbying expenses 2024	Arguments and positions
Global Compact	BRL 148,860.00	Action to comply with the Paris Agreement and develop low-carbon solutions.
Brazilian Business Council for Sustainable Development (CEBDS)	BRL 102,600.00	The Organization supports the regulation of the carbon market in Brazil and the development of public policies encouraging sustainable practices
APINE – Brazilian Association of Independent Electricity Producers	BRL 233,708.04	It operates to disseminate technical information that contributes to the energy transition and interacts with the executive and legislative branches in the formulation of public policies aligned with sustainable development.

Organization Name	Lobbying expenses 2024	Arguments and positions
ABRAGE – Brazilian Association of Electricity Generating Companies	BRL 482,283.32	It operates to disseminate technical information that contributes to the energy transition and interacts with the executive and legislative branches in the formulation of public policies aligned with sustainable development.
Brazilian Clean Energy Generation Association – ABRAGEL	116,400.00	ABRAGEL aims to further strengthen the importance of Small Hydroelectric Power Plants (PCHs), Hydroelectric Generating Plants (CGHs) and Authorized Hydroelectric Power Plants (UHEs) up to 50 MW before society and the Public Authorities, with the objective of continuing to promote the segment's leading role alongside other renewable sources of energy production in Brazil.
Public Emissions Registry – Brazilian GHG Protocol Program	10,700.00	Public Emissions Registry is a pioneering platform in the country for the transparent, quick and simple disclosure of corporate greenhouse gas (GHG) emissions inventories of organizations participating in the Brazilian GHG Protocol Program.
